参考: 2025 年度講義内容 (内容は変更されることがあります)

Course Summary: Asia Workshop is a dynamic working space where students and instructors collaborate to discuss emerging issues in Asia. Topics for discussion change every year to keep up with developments on both regional and global scales.

This year, the workshop focuses on various emerging issues such as poverty, inequality, gender, and polarizing orders in the context of Asia. We will provide a series of guest lectures on Asia and its member countries to foster both broad and in-depth understanding of the region and its adaptation to globalization.

Students are required to engage in problem-definition exercises—identifying potential problems and exploring possible solutions.

We have also designed fieldwork simulation activities to encourage students to engage in intensive observation of their living environments. Immersive technologies will be introduced to enhance students' first-hand observation experiences.

Objectives / Intended Learning Outcome: Students are expected to develop a critical perspective on Asia and the emerging issues within the region. Additionally, they will be equipped with essential field research skills, such as on-site observation and interviewing techniques.
